## Aloe Vera

Aloe vera has ancient history for their use in female for improvement of femininity and reproductive growth.

In ancient language of **SHANSHKRUTA**, the name aloe vera mention as **GHRUT-KUMARRI**. Synonym of Kumarri represents **YOUNG GIRL** as in ancient time aloe vera use for treatment of menstruation and fertility issues in females.

As per resent work and documentation it was found that, aloe vera comprises with more than 200 bioactive components among them 70 are nutritional one. This includes amino acid, polyssacharides, vitamins, minerals, enzymes, steroids, saponin and biological stimulator. This component contributes key role of aloe vera utilization in reconstitution and regeneration of ill cell in living body. As it regular intake in form of juice and extract stimulates pancreatic beta cell that responsible for controlling of sugar level in blood, likewise thinning of blood plasma in high blood presser condition, secretion of synovial fluid in arthritic condition, secretion of prostaglandin in hyperacidity situation, improves peristaltic movement of gastro intestinal tract in constipation. Biological stimulator and enzymes in aloe vera improve the metabolic functionality of liver and kidneys. Presence of Natural antioxidants like vitamins, saponin and enzymes helps in body detoxification.
